

Mechanical Technician

Boston Cryogenics LLC
34 Sullivan Rd, Unit 18
North Billerica, MA 01862
Full-time

Job Description

Company Profile

Boston Cryogenics LLC is a start-up aiming to develop and manufacture next-generation cryogenic cooling systems for industrial and scientific applications.

We are looking for a self-motivated mechanical technician who is willing to ask questions, improve mechanical skills, and contribute to the cutting-edge technology.

About the Role

As a mechanical technician, your role is to work closely with engineers to move products from design to production.

Core Responsibilities:

- Assist mechanical engineers with mechanical design and system assembly
- Work with complex parts with tight tolerances
- Assemble prototypes using brazing or welding tools
- Collaborate with engineers to troubleshoot problems
- Monitor parts inventory and replenish supplies
- Maintain a neat, clean, and organized work area and follow all company safety guidelines

Requirements:

- An associate degree in mechanical engineering technology or related major
- Occupational Safety and Health Administration (OSHA) certificate
- Knowledge of mechanical engineering designs and installations
- Experience operating machinery including lathes, mills, etc.
- Brazing or welding experience preferred
- Time management skills

Boston Cryogenics offers a competitive compensation and benefits package including transactional bonus plan, medical, vision, and dental insurance, vacation / sick days, etc.
